Heliport maniaları için usuller:

Heliportlar; helikopter türü, performans ve ağırlık gibi ilgili kriterleri içeren görecek uçuş kurallarına (VFR) ilişkin ulusal ve uluslararası düzenlemelere uygun olarak oluşturulacaktır. Helikopter operasyonlarının emniyeti için heliport çevresindeki doğal ve yapay engeller göz önüne alınmalıdır. Pilotlar ve helikopter işleticileri operasyon emniyetini sağlamak amacıyla operasyonlarını gerçekleştirmeden önce heliport çevresinde bulunan engelleri incelemek ve değerlendirmek zorundadırlar.

HELIPORTS - LANDING STRIPS

Licensed heliports are listed on the following web site.

Landing strips are listed in the following web site;

Procedures for heliport obstacles:

Heliports must be available for helicopters according to the national and international regulations on visual flight rules (VFR) with related criteria such as helicopter type, performance and weight. Considerations of natural and man-made obstacles for the safety of helicopter operations around the vicinity of heliport is essential. Before performing helicopter operations, the pilots in command and helicopter operators have to study and assess the obstacles in the vicinity of heliports for the purpose of the safety of their helicopter operations.
